DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on January 28, 2008 has been entered.

Election/Restrictions

Claims 1-7 and 11-13 are allowable. Claims 9 and 10, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions comprising Species I and Species II, as set forth in the Office action mailed on August 10, 2004, is hereby withdrawn** and claims 9 and 10 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-7 and 9-11 are allowed.

Ex parte Quayle

This application is in condition for allowance except for the following formal matters:

The disclosure is objected to because of the following informalities: The references to “claim 1” (page 2, line 20-21) and “the sub-claims” (page 2, line 21) is objected to as the specification provides the support for the claims and claim 1 has been amended from its original filing so that the meaning of this reference is unclear. Further, the summary of the invention is commensurate with the claims but a reference to specific claim 1 and sub-claims is inappropriate as it is a stereotypical general statement that would fit one application as well as another and serve no useful purpose. As the purpose of the brief summary is to apprise those interested in the particular art of the nature of the invention, the summary should be directed to the specific invention being claimed, in contradistinction to mere generalities which would be equally applicable to numerous preceding patents. It is suggested that this reference be replaced by whatever specific features are directly on point as being applicable to the case at hand by summarizing the invention being claimed. As it is, the paragraph on page 2, lines 20-21 comprises stereotypical general statements that serve no useful purpose and must be modified as indicated above or cancelled as surplusage. Correction is required.

The abstract of the disclosure is objected to because the form and legal phraseology often used in patent claims, such as "invention" (line 1) should be avoided. It should avoid using phrases which can be implied, such as, "The invention relates" (line 1). Correction is required. See MPEP § 608.01(b).

.Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
